EDUCATION

2022 – 2026	B.Tech – Computer Science and Business System. Gokaraju Rangaraju Institute of Engineering and Technology, Hyderabad CGPA: 8.5
2020 – 2022	Intermediate – MPC Narayana Junior College Bachupally, Hyderabad Percentage: 98.3%

SKILLS

Programming Languages

C, C++, JavaScript and SQL

Web Technologies

HTML, CSS, JavaScript, Bootstrap, Responsive Design

Full-Stack Development

MERN (MongoDB, Express.js, React.js, Node.js)

Database

MongoDB, MySQL, Oracle DB

Other

OOPS, REST APIs, Agile, Machine Learning

Tools

GitHub, Swagger, Postman, VS Code

PROJECTS

Gate Pass Management System

- Built a full-stack system to manage entry and exit of individuals/vehicles with **role-based access control**.
- Integrated **real-time notifications** and secure data tracking for request approvals and status updates.
- Developed a responsive UI and backend using **Node.js, Express.js**, and SQL for secure record storage.

Tech Stack: HTML, CSS, JavaScript, MERN Stack, SQL

BLOG-APP

- Developed MERN blog platform with role-based access allowing comments and authors to manage content.
- Implemented **CRUD operations** for articles with admin control over authors and users for secure interactions.
- Designed dynamic UI with **React** and handled routing, auth, and data flow using **Express & MongoDB**.

Tech Stack: React.js, Node.js, Express.js, MongoDB, HTML, CSS, JavaScript

Crop Recommendation System

- Created an ML-based system to recommend suitable crops using **soil, weather, and historical data** as input.
- Utilized supervised learning algorithms to build and tune models for accurate **data-driven predictions**.
- Built a command-line prototype in Python to test user inputs and model accuracy for real-world scenarios.

Tech Stack : Python, Machine Learning (Pandas, Scikit-learn)

PROFESSIONAL EXPERIENCE

02/2025 – 05/2025

Hyderabad, India

Software Developer Intern – MERN Stack

Perennial Code Software Solutions, Hyderabad

- Contributed to two live full-stack projects: **Pereco & SuntekEcommerce**.
- Developed **RESTful APIs** using **Node.js** and **Express.js** for various backend features.
- Worked with both **MySQL** and **MongoDB** for database design, and integration.
- Documented **APIs** with **Swagger** to support frontend-backend integration.

06/2024 – present

Hyderabad, India

Google Developer Groups On Campus [GDGOC]

Logistics Management

- Managed event logistics, coordinated resources, and resolved real-time issues.
- Ensured seamless execution of campus tech events through efficient planning.
